Frontend Developer

Web application developer. ReactJ, NextJs, Vanilla JavaScript. Alquiler Argentina, Real Trends (with MercadoLibre API), MRM//McCann (General Motors and Latam Airlines), etc. Django, NodeJs + Express, jQuery, Git. I am seeking a challenging role where I can leverage my extensive experience in web development using ReactJs, along with my proficiency in other related technologies such as Sass and Django. I aim to contribute to innovative projects in a dynamic environment while continuing to grow and expand my skill set.

Work Experience

Senior Software Engineer at Keyway   05/25 - Present
AI-powered real estate application with processed property data

- Develop and maintain a real estate web application using Next.js, Material UI and TypeScript.
- Implement APIs and data workflows with tRPC to process and visualize property information.
- Build high-quality, reusable and scalable UI components following Figma design guidelines.
- Collaborate closely with Product and Design teams to transform business needs into user-friendly solutions.
- Research and adopt new frontend technologies to improve performance and user experience.
- Apply agile methodologies to organize and deliver tasks efficiently.
- Manage code versioning and collaboration using Git.

Main Technologies: Next.js, React, TypeScript, tRPC, Material-UI, Figma, Git, Design Patterns, SOLID, DRY.

Frontend Developer at Alquiler Argentina   05/24 - 05/25
Vacation rentals in Argentina

- Analyze requirements, specifications and input data and propose the best technical solution for a given business problem.
- Develop and maintain new projects and enhancements.
- Building high quality reusable code.
- Researching new technologies.
- Application of agile methods for the development of activities.
- Teamwork with the Product department.
- Code versioning with GIT.

Main Technologies: ReactJs, NextJs, TypeScript, TailwindCSS, Git, Redux, Material-UI, Design Patterns, SOLID, DRY.

Senior Frontend Developer at Real Trends   11/21 - 02/24
Web platform to optimize sales in MercadoLibre

- Translate UI/UX Figma designs and wireframes into high-quality code, producing visual elements of the product.
- Develop and maintain all aspects of our web applications, ensuring high performance and seamless integration with our backend.
- Evaluate and leverage advanced JavaScript/Typescript libraries and frameworks.
- Build reusable code/components/libraries for future use.
- Participate in code reviews to maintain code quality and share knowledge.
- Use of server-side CSS preprocessing platforms, such as LESS and SASS.

Main Technologies: ReactJs, Vanilla JavaScript, SASS, Django, Git, Docker, SASS, RESTful API, Design Patterns.

Frontend Developer at Dos Al Cubo   11/19 - 10/21

CMS for independent news portals

- CMS maintenance and feature creation.
